

WOODY'S
HORSE NUTRITION

Made in small batches with locally-sourced ingredients in Dickinson, ND

WOODY'S GROWTH

PELLETED FORMULA

Designed to meet the unique nutritional requirements of broodmares and growing horses | Available in 50 lb (22.67 kg) bags

WOODY'S GROWTH IS IDEAL FOR:

- Pregnant and lactating broodmares
- Growing weanlings and yearlings
- Stallions

Woody's Growth meets the unique needs of broodmares, foals and growing horses in an easy to chew, easy to digest pellet. Amino acids Lysine and Methionine, chelated minerals and a complete vitamin package are the building blocks for mare health, lactation and foal development. Beet pulp functions as a "super fiber," providing a safe source of energy. Probiotics provide gut support to get the most out of the feed. Omega-3 fatty acids from flax help strengthen immune systems in both mare and foal.

Feeding Instructions: Feed broodmares a minimum of 0.5 to 1 pound of Growth per 100 pounds of body weight, depending on month of pregnancy or lactation, body condition and forage quality. Begin creep feeding up to 1% of foal body weight before weaning. Feed weanlings and yearlings 1% of body weight, based on condition. Increase the number of feedings per day to keep the amount of feed below 5 pounds per feeding. Feed with free choice good quality hay/pasture and clean, fresh water. Any change in feed or feeding routine should be done gradually over a 1 to 2-week period.

GUARANTEED ANALYSIS

Crude Protein (min)	14.50%
Lysine (min)	1.10%
Methionine	0.45%
Crude Fat (min)	7.50%
