HORSE NUTRITION

Made in small batches with locally-sourced ingredients in Dickinson, ND

# WOODY'S HAY STRETCHER

PELLETED FORMULA

Provides essential nutrition and fiber for horses who may not have quality forage | Available in 50 lb (22.67 kg) bags

## WOODY'S HAY STRETCHER IS IDEAL FOR

- Horses without access to quality forage
- Horses who have difficulty chewing hay
- Horses with metabolic concerns
- Traveling

**Woody's Hay Stretcher** can replace up to 75% of the daily forage requirement, making it ideal for horses who may not be able to chew and digest enough hay. It is a simple, no-fuss pelleted feed designed to help stretch your hay supply. Hay Stretcher is a safe, stable and consistent way to get fiber in your horse. A grain free pellet, Hay Stretcher is ideal for horses who may need wet hay or feed. The pellets are easier to soak and hold more water than hay. Formulated to have comparable major nutrients to an average cool-season grass hay, with added Vitamins A, D and E to support health. Alfalfa, beet pulp and soy hulls provide nutrition as nature intended with chelated minerals to maximize uptake and utilization.

**Feeding Instructions:** Feed Hay Stretcher as a pound for pound substitute for hay, up to 75% of the daily ration. If feeding less than 1 pound per 100 pounds of horse body weight, pair with a balancer such as Woody's Ration Balancer or Woody's All In. Horses should consume a minimum of 1.5% of their body weight in quality hay or pasture. Consult your veterinarian before reducing feed or forage below the recommended levels. Any change in feed or feeding routine should be done gradually over a 1 to 2-week period.
